ILLUSTRATED PRICE CATALOGUE 1913 - 1914

A California Home.

To Patrons: Former and Prospective

IS, our Illustrated Price Catalogue for the season of 1913-1914, contains, with brief descriptions and correct illustrations, the very best Fruits, Ornamental Trees and Shrubs, Palms, Roses, etc., for planting in the extreme western part of our country

We desire to extend to our many satisfied customers our sincere thanks for their patronage, and the assurance that we are better able than ever to supply their wants. To those who have never dealt with us, but whom we should like to include among our friends, we shall be glad to demonstrate the high quality of our stock, our ability to handle all orders, and our high-

Our president and manager, Mr. George C. Roeding, is known the country over for his exhaustive research and untiring experiments in California horticulture. It is due to his personal efforts that Smyrna Fig culture has become such a prominent feature of the fruit-growing industries of the Pacific coast.

Our business principles may be summed up in the following:

To give our very best personal attention to all orders.
To ship goods promptly and insure their reaching our patrons in good condition.
To send out no tree or plant we would hesitate to plant ourselves.
To invite correspondence on any subject pertaining to our business.
To place our services at the disposal of our patrons, and furnish advice on anything pertaining to our line.

The descriptions in this book are necessarily short. A fund of information upon nearly all subjects listed here will be found in "California Horticulture," which sells at 25 cents, postpaid.

At our local sales yards, L and Fresno streets, Fresno, we will carry a fine line of ornamental plants to meet the demands of our customers who have found it inconvenient to visit our nurseries. Our main office is located at 3rd floor Holland Building, No. 2137 Fresno street, in very commodious quarters. From here we are in telephonic communication with all of our nurseries and departments.

GUARANTEE OF GENUINENESS

Our trees are all budded or grafted from bearing trees, and every care and pre-caution is exercised to have them true to name. With all our caution, mistakes are liable to be made; but we hold ourselves in readiness, on proper proof, to replace all trees and other stock that may prove untrue to label, free of charge, or refund the amount paid. It is mutually understood and agreed to between the purchaser and ourselves, however, that our guarantee of genuineness shall, in no case, make us liable for any greater sum than that originally paid us for the trees, etc., which may prove untrue.

To Intending Purchasers

Things to Observe

- All orders should be legibly written on a separate sheet of paper, and not mixed up with the body of the letter.
- In ordering please state whether substitution will be permitted, as we feel at liberty when no instructions accompany the order to replace with other sorts as nearly similar as possible.
- It often happens that a variety of which we grow only a limited quantity is exhaused early in the season, and as it may be impossible to secure it from other nurseries, it is either necessary to cancel the order or substitute with another kind which is similar. In nearly all cases when we exercise our judgment we do not hesitate to say that we believe our customers will approve of our desire to please them.
- 3. Our packing and labeling are as perfect as possible, and we charge for the same only to cover the cost of material. Cartage to the railway or express office free of charge.
- 4. State distinctly how you wish us to ship—by freight or express; also designate the route, otherwise we use our own discretion in forwarding.
- 5. After delivering to the carriers we cannot hold ourselves responsible for any loss or injury to trees or plants after they have been carefully packed and shipped; but we will do everything in our power, if any loss should occur, for the protection and recovery of our customer's property.
- Orders to be sent by express, C. O. D., be filled, provided one-half of the will be filled, provided one-hamount is sent with the order.
- 7. If any mistakes are made in filling orders, we will cheerfully rectify the same,

- but must respectfully request our customers to notify us at once, or, at the most, within ten days after receipt of the goods.
- 8. Orders from unknown correspondents must be accompanied by a remittance or satisfactory reference.
- 9. We uniformly tie our trees in bunches of 10, and grape-vines in bundles of 50; and we suggest to our patrons to make their orders for assortments as far as possible in multiples of these numbers.
- 10. Articles mentioned in the following list will be furnished at prices named as follows: Five at the 10 rate; 50 at the 100 rate; 500 or more at the 1000 rate. Less than five of a variety at the single rate. This does not mean, as an illustration, that 10 pears, 10 apples, 10 plums, 10 nectarines would be charged at the 100 rate. To secure this rate it will be necessary to order 50 trees of one sort 50 trees of one sort.
- 11. For the convenience of those who cannot be reached by railroad or express, packages of small trees, if in stock, not exceeding eleven pounds in weight, can be forwarded by parcel post, such articles to be charged at single rates, postage additional.
- Please remember to write your name, 12. Please remember to write your name, postoffice, county and state as distinctly as possible; also give your nearest express office and railway station, or if on a stage route, send us special directions, giving us the name of the transportation company delivering the goods. Orders for export to Old Mexico, the Hawaiian Islands, Cuba and South American points should give, in addition to the above, the steamship routes by which their orders are to be shipped.
- All remittances should be by postoffice money order, registered letter, express order, bank draft, or check. All orders from for-eign countries to be accompanied by draft, international money order.

TO INTENDING PURCHASERS—Continued

About Weights and Shipping

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give α clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about ar follows: 6 to 8 ft., 2 pounds each; 4 to 6 either in bales or cases, average about arfollows: 6 to 8 ft. 2 pounds each; 4 to 6 ft. 1, pounds each; 2 to 3 ft. 1 pound each: 2 to 3 ft. one-half of a pound each. Grape-vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 ft. and up to 12 to 15 ft., 3 to 6 pounds each.

Potted plants in from 3 to 6-inch pots, packed in boxes, weigh from 4 to 12 pounds

Citrus trees, balled, packed in boxes, ounds each, and with naked roots, pounds roots. nounds each.

Palms, packed in boxes, with ball of earth, 2 to 3-ft. plants, 40 pounds, and gradually increasing to 110 pounds each on 5 to 6-ft. plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds

Approximate Packing Charges

is difficult to give these charges accu-It is difficult to give these charges accurately, as they will vary more or less, according to the condition of the trees; however, the figures given are taken from our records of charges for the run of shipments for sizes specified: 6 to 8-ft. trees in bales, \$2.50 per 1000; 4 to 6-ft. trees, \$2.25 per 1000; 3 to 4-ft. trees, \$2.20 per 1000; 6 to 8-ft. trees completely boxed, \$6 per 1000; 4 to 6-ft. trees, \$3.50 per 1000; 3 to 4-ft. trees, \$3.00 per 1000; 3 to 4-ft. trees, \$3.00 per 1000. Grape-vines, in bales, 75c per 1000 vines; in cases completely boxed, \$3 per 1000 vines. The cidulus or namental trees, 6 to 8 ft.

Deciduous ornamental trees, 6 to 8 ft. and up to 12 to 15 ft., in bales, from 40c to 50c per 100, and completely boxed, 50c to \$2.00 per 100.

from 3 to 6-inch pots.

Potted plants in from 3 to 6-inch from 3c to 10c each.
Citrus trees, balled, packed in boxes, protected with burlap, 10c per tree (1 curus trees, balled, packed in boxes, tops protected with burlap, 10c per tree (boxes hold from 10 to 12 trees), in cases, completely boxed, 10c per tree; naked roots, packed in moss in boxes, tops burlaped. 1½c per tree; completely boxed, 2c per tree. tree

balled. in boxes. from 10c to 20c per plant, according to size.

Grape cuttings packed in bales, 30c per 1000 cuttings, and in cases, completely boxed, 75c per 1000.

Eucalyptus, cypress and hedge plants, tops covered with burlap, in flats, 15c per

As has been previously stated, the weights as nas neen previously stated, the weights and packing charges given are merely a general average, and these data are supplied for the purpose of placing our customers in position to figure out about what their stock will cost them delivered at destination. We desire to assure our patrons that we only charge for packing to cover the cost of material used. the cost of material used.

Freight Classification

It may not be generally understood that the method of packing a shipment of trees or plants is the basis on which freight charges are made. Nursery stock in bales or boxes completely covered with tule or burlap take a first-class rate, while in cases completely boxed the third-class rate applies. When trees are shipped without packing, the classification requires the payment of the double first-class rate.

In carload lots with a minimum of ten tons, class C applies, and this is as a rule from 50 to 75 per cent less than the first-

class rate. For loca class rate.

For local shipments in Californ are either packed in bales, wrap tule, or in boxes, tops protected lap; for the difference between the California, with bur-

ween the first and burners are so slight that nothing sained by boxing, for the increased cost would more than offset the saving in freight charges.

To distant points in Texas, Mexico, Colorado, and to other states and countries outside of California, when stock is to be a long time in transit, it is packed in paperlined cases, not only with a view of having the trees carry better, but also because of the saving in freight charges, the difference in classification being in many cases \$1 per 100 pounds.

We have made a very close of traffic conditions, and used to secure freit.

We have made a very close study of traffic conditions, and our knowledge is used to secure in all cases the very lowest freight rates for the benefit of our customers.

tomers. No accurate data can be given as to freight charges on orders for export, except that in a general way a shipment by water to Australia or Japan from San Francisco will cost about one-third less than it does from Fresno to San Francisco, a distance of 206 miles.

Square Method-Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the prodplants are apart in the rows, and the post-uct will be the number of square feet for each plant or hill; which, divided into the number of feet in an acre (43.560) will give the number of plants or trees to an acre.

Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre the number of plants required to the acre by this method.

each. Very large; brownish red; flesh pale yellow; valuable for shipping. Early June. Peach.

Satsuma atsuma (Blood Plum.) Large; dark red from skin to pit; firm; juicy. Early July.

Shropshire Damson. Oval; dark blue; very firm; flesh greenish, juicy and sprightly. Late Sept. Simon Plum. (Apricot Plum.) Prunus Simoni. Large; cinnabar-red; flesh yellow, with pine apple and banana flavor. Early July.

ashington. Large; yellow, with crimson blush; flesh yellow, firm, sweet. Early Aug. Washington.

Wickson. Tree strong, upright grower. Heart-shaped; flesh amber; juicy. Early Aug.

Yellow Egg. Showy market variety and good for canning. Large; oval; deep golden; juicy; rather acid. July and Aug.

Burbank's Latest Creations in Plums

The following varieties are the latest creations by Burbank. Write for beautifully illustrated booklet depicting fruits in colors, from life. Price 25c.

ORMOSA. This Japanese plum possesses such a combination of good qualities that brings it prominently to the front as a grand shipping fruit. Tree is a vigorous upright grower with large cherry-like foliage; fruit of the largest size, heart-shaped and of a light cherry-red color. Flesh pale yellow, usually firm, sweet, rich, delicious, with delightful flavor. Ripens July. On Peach and Myrobolan root. FORMOSA.

July. On Feach and Myrobolan root.

GAVIOTA. This beautiful plum has qualities which are sure to make it a highly esteemed table and shipping fruit. Ripens 2 weeks after Formosa; is of a deep reddish purple color; flesh honey-yellow; fragrant and sweet to the pit, which is so small in comparison with size of fruit that it might almost be called "seedless." On Peach and Myrobolan root. Myrobolan root.

Myrobolan root.

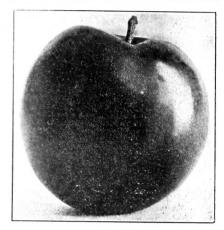

RUTLAND PLUMCOT. This new fruit is a cross between a plum and an apricot. It produces fruits in liberal quantities where apricots fail entirely. Fruit large, with a deep purple, velvety skin, brilliant red flesh with subacid flavor; desirable for cooking, jellies and jams. On Peach and Myrobolan root.

[&]quot;California Horticulture" gives full descriptions of stock listed herein, as well as cultural instructions. It will be mailed, postpaid, for 25 cents.

PEX PLUMCOT. This new fruit ripens with the earliest plums. Tree a strong, compact, upright grower and good bearer, APEX PLUMCOT. even where apricots cannot be grown, and in seasons where some plums are failures. Fruit very large and handsome, globular, color deep pink or light crimson, free-stone; flesh honey-yellow, firm, rich, aromatic, apricot-like; unequalled in size, beauty, productiveness and quality by any other early fruit.

other early fruit.

ANTA ROSA. If there is any one fruit whose characteristics are individualized, they are markedly pronounced in this one plum. To begin with, it is extremely early, ripening the middle of June; it is very large; of a deep purplish crimson color, with pale blue bloom; flesh near skin is a purple shaded with rosy scarlet and pale amber toward the stone, which is quite small. Has a slight acidity next to the skin, merely enough, however, to relieve fruit from cloying. Its qualities may be summed up briefly by stamping it as a good grower, good bearer, fine shipper, good keeper, and in every way a money-maker. On Peach and Myrobolan root.

Santa Rosa Plum.

(Quetsche.) erman. (Quetsche.) Long; purple, blue bloom; flesh green, sweet; freestone. Aug. German. Hungarian. Tree is a vigorous grower, and heavy bearer. Very large; redish violet; juicy, sweet; profitable for shipment. Aug. Very large; et. Valuable Imperial Epineuse (Imperial). violet-purple; exceedingly sweet. Valuable market variety on account of size and quality. Sept. obe de Sargent. Large; deep purple; flesh rich and sugary. A fine prune, about ten days earlier than the French Prune. Aug. and Sept.

Silver lver Prune. Largest size; pale yellow; profitable for bleaching and canning. Sept. Prune. Largest Sugar. Dark purple; flesh yellow, tender and rich; valuable for shipping green. Early Aug.

Tragedy. Dark purple; flesh yellowish green; very rich and sweet. Valuable shipper. very rich and sweet. Early July.

New Prune, "Standard"

Each \$7.50 \$60.00 6.00 50.00

This late introduction of Burbank is a cross between Tragedy and Sugar Prune. It has been tried in a commercial way now for several years, and its possibilities as a high-grade Prune have been established beyond a question or a doubt.

Burbank writes of it as follows:

"The trees are enormous and never-failing bearers, and strong, healthy growers. Well-grown fruits measure four and a half inches around one way by nearly six inches the long way. Skin dark reddish purple, with a heavy blue bloom; flesh honey-yellow, fine-grained, juicy, yet firmer than most other drying Prunes. Is very sweet and a perfect freestone.

"This is without doubt the best combination drying and shipping Prune ever grown. The final test as to the value of this Prune is that, when dipped, the result is a quickly dried Prune which is larger than any heretofore grown."

New Prune, "Conquest"

One of Burbank's late introductions. One of Burbank's late introductions. The tree is a vigorous, healthy, rapid grower and unusually productive. The fruit is very similar to the French Prune in form, size, color and golden sweet rich flesh. The stone has been eliminated with the exception of a tiny speck. The fruit is valuable and the tree is very productive. Ripens with the common French Prune and is in all respects very much like it in size, quality and appearance. Price \$1.50 each; \$10.00 per 10; \$75.00 per 100. 100. per

French Prune (Improved)

French Prune (Improved)—On Almond, Myrobolan and Peach roots—

						Each	10	100	1000
1	yr.,	4	to	6	ft.	\$0.60	\$5.00	\$40.00	\$300.00
1	yr.,	3	to	4	ft.	.50	4.00	30.00	250.00
1	yr.,	2	to	3	ft.	.40	3.00	20.00	180.00

To term it anything else would simply be misleading. One of our leading growers called our attention to an orchard of this variety at Suisun, Solano County, in which extending over a period of years, large sizes were the rule rather than the exception. Growers in this section insist on having this variety in preference to the regular French Prune, knowing from years of observation

that without exception the fruit produced on the sport is identical in every particular except in size, and in this there has never been any variation, the prunes averaging from 30s to 40s from year to year without exception. Careful investigation on our part convinces us of the merits of this improved type of French Prune which to all appearances is the genuine sort with the exception that the branches are inclined to droop some and that it produces without fail every year large crops of fruit, all of which are of the largest sizes. This demonstration of selection must appeal to every fruit grower. Further facts concerning this prune will be furnished on application. Not having a very heavy stock, only a limited number of trees will be offered for sale this year.

Sims Cling Peach.

Sims Cling. Large to very large; golden yelms ting. Large to very large; golden yellow, with faint blush; flesh deep yellow, of fine texture, firm and rich; pit small. We regard it as the best clingstone for canning and recommend extensive planting. Ripens middle of August.

eed. Large, creamy white, with blush cheek; tender, juicy; valuable for ship-ping. One of the earliest. Middle of May. Sneed.

rawberry. Medium white, marbled dark red: flesh white, juicy, with rich flavor. Early July.

Susquehanna, Large; yellow, nearly covered with red; flesh yellow, sweet, juicy. Aug.

Triumph. Large, with small pit; yellow, covered with dark crimson in the sun; flesh bright yellow, juicy and sweet. Middle of June.

Tuscan Cling. (Tuskena. Yellow Tuscan.)
Very large; yellow. The best early canning Peach. Middle of July.

Van Buren Dwarf. Tree very dwarf and or-namental; fruit medium, yellow shaded red; flesh yellow. Middle of Aug.

Wheatland. Very large; yellow, shaded red; flesh yellow; firm, melting, juicy. Aug.

Vellow St. John. Favorite southern sort; medium; yellow, red cheeks. Late June.

New Peach, "The Leader"

Price, 75c each; \$6.00 for 10.

This and the following, originated by Burbank and described by him the earliest of all the Muir X Crawford types, ripening near the coast in July. Unsually vigorous trees which never fail to produce a full crop of beautiful, smooth, globular, bright yellow fruit with deep crimson blush; fiesh pure yellow, meaty, firm, very sweet and delicious—far superior to any other. Freestone—exceedingly small stone. Has never shown any trace of curl leaf. This and the following, originated by Burleaf.

The best Peach for canning or shipping owing to its earliness, productiveness, glob-ular form, beautiful appearance, firm, deular form, beautiful appearance, firm, de-licious flesh, and long-keeping qualities. A Peach with all the good qualities of the Muir and Early Crawford combined and with the addition of several new ones. As a home Peach, unexcelled.

New Peach, "The National"

Price, 75c each: \$6.00 for 10.

A giant Muir X Crawford Peach which, like the "Leader," is yellow, but is half covered with deep crimson-blush and crimcovered with deep crimson-blush and crimson dots. Tree a strong grower and neverfailing producer of very firm, nearly globular fruits. Freestone—small stone. Flesh pale yellow, firm, superior quality, far excelling either parent. Ripening from ten days to two weeks after the "Leader," and before the old Muirs and Crawfords. Entirely free from curl leaf.

A firm and most delicious Peach when canned, and unexcelled for drying and shipping. Extra handsome and extra good, also as a market or home Peach.

New Peaches

Prices on Peach roots— Each 10 10 1 year, 4 to 6 ft...\$0.40 \$3.00 \$25.00 1 year, 3 to 4 ft... 30 2.50 20.00

CONNET'S SOUTHERN EARLY. Creamy white, with bright red blush; large, and of fine flavor; the tree is a vigorous grower. Last of May.

REENSBORO. Originated at Greensboro, N. C. Among the earliest and largest. Greamy white, with dainty blush; a wonderfully vigorous grower. May 1.

MAYFLOWER. One of the earliest Peaches; red all over. Tree a strong grower, la bloomer and heavy bearer. Early May.

KLAHOMA BEAUTY. Extremely large; nearly round, with high color. Among the finest in quality. Specimens measure 8 inches in circumference. May. OKLAHOMA BEAUTY.

OKLAHOMA QUEEN. "Queen of Peaches." Larger than Greensboro in size, color and quality, one of the finest early Peaches grown. Wonderfully productive. Middle

New White. Large; greenish white. Early July.

Stanwick. Very large; skin pale, shaded rich violet; flesh white, tender, juicy. The best all-round drying, shipping and canning sort. Aug.

Humboldt. Very large; bright orange-yellow, streaked crimson; flesh orange. Aug.

THE NUT TREES

Almonds

Prices-On Aln	nond and	Peach roots-	Each	10	100	1000
1 year, ½	to % cali	per	\$0.30	\$2.50	\$20.00	\$150.00
1 year, 3/8	to 1/2 cap	iler		2.00	15.00	125.00
1 vear 1/4	to % cali	ner	2.0	1.50	12.50	100.00

The natural tendency of almonds is to grow stocky, rather than tall, therefore trees are listed on caliper basis rather than by height

Drake's Seedling. Regular and abundant bearer; soft shell.

Harriot's Seedling, or Commercial. One of the largest of the soft shells, with a sweet kernel

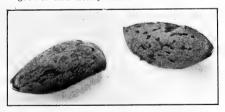

X. L. Sturdy, upright grower; nut large; soft-shell; bears heavily and regularly. Highly recommended by all orchardists.

Ne Plus Ultra. Large and very long; shell. A rapid grower and regular, h bearer. soft

Nonpareil. Weeping habit and forms a beautiful tree. One of the best. An extraordinary heavy bearer of the paper-shell type.

Peerless. Preferred by some to I. X. L., which it resembles, but the nut is larger. Texas Prolific. Closely resembling Drake's Seedling. Kernel very plump and of me-dium size, shell soft, hulls very easily. Never fails to produce a good crop.

The Jordan. The famous Spanish variety so long sought after by nut-growers. Nuts are long, with hard shells; the kernels are superior in flavor, long and plump and filling the entire cavity. A strong grower and heavy bearer.

Eureka Almond.

UREKA (New). This is a novelty only in the sense that it has never been offered for sale before last season. Blooms with Nonpareil, usually in full bloom Mar. I. Nuts mature Sept. 1. One of the leading firms in San Francisco, has bought the crop from this one orchard for a period of years writes of it as follows: "The Eureka, on account of the similarity of the kernel in shape and flavor to the famous Jordan, commands the very highest price, and confectioners pay a premium to secure it." It differs in two essentials to the Jordan, being somewhat smaller in size and is a papershell. The tree is not only an exceptionally strong grower but is an unfailing heavy cropper. Originated on the farm of A. M. Newland, Colusa, Cal. Trees are eighteen years old and a failure of crop has never been known. The commercial value of this nut has been established by years of trial. Mr. Newland's orchard of this variety is extensive and he recommends it above any

other variety. To the prospective fruit grower, our words of commendation must be summed up by advising the extensive planting of this valuable variety which has so much to commend it."

Butternut

The rough-coated nut, with a peculiar but most attractive flavor, so well known in the Middle West.

Each 10 1 to 2 feet......\$0.50 \$4.00

Chestnut Seedlings

Each

American Sweet. The well-known native tree of the Eastern states; nuts small but, sweet; very desirable in coast counties.

Italian, or Spanish. Introduced from Europe. Very ornamental; medium-sized nuts.

Chestnut

Grafted Varieties

				Each	10	100
6	to	8	feet	. \$1.00	\$8.00	\$60.00
4	to	6	feet		6.00	50.00
3	to	4	feet	60	5.00	40.00

The grafted varieties come into bearing when four years old and produce nuts of superior quality. The trees have more distinctive character. For fruit and ornamental purposes they have few equals.

Japanese Mammoth. Tree of compact habit. Nuts very large, being over an inch wide and weighing $1\frac{1}{2}$ ounces each.

Marron Combale. French; nut large sweet and highly flavored; glossy foliage.

Marron de Lyon. Similar to the preceding, but the nuts are somewhat larger. Numbo. Nuts large, handsome, and as finely flavored as any large Chestnut.

Filbert

2 to 3 ft., 75c each.

Filberts are particularly well adapted to the coast counties and the lower mountain-ous and foothill regions. The nuts have a sweet, delicious flavor and are in great de-mand.

uropean White. Should be trained as bush rather than a tree. Nut large, o'long; kernel sweet and highly flavored. European oh-

Shagbark Hickory

3 to 4 ft., \$1.00 each.

Very striking trees with straight tall trunks and lustrous foliage. The nuts have a peculiar rich flavor. Should be planted only in localities influenced by the coast breezes.

Pecans.

Pecan Seedlings

				Each	10	100
4	to	6	feet	.\$0.70	\$6.00	\$50.00
	0.3		foot	6.0	5.00	40.00

Pecans Grafted

Each 10 \$1.50 \$12.00

3 to 4 feet\$1.50 \$12.00

Too much cannot be said in praise of the improved types of the Pecans. The Papershell types, which we are offering for sale, are so far superior to the common Pecans, that they cannot be considered in the same attegory. The Pecan thrives and produces fine crops of nuts in all localities throughout California, except in the immediate vinity of the coast, where on account of the fog and cool breezes they would be rather late in maturing. late in maturing.

otscher. One of the best; nuts cylindrical; shell thin, parting from the kernel easily. bst. Nut cylindrical; soft-shell; kernel particularly well filled. Pabst.

particularly well filled.

Russell. Vigorous and productive. Nut oval, pointed, very large; shell very thin.

Stuart. A standard for commercial orchards; large; good shape and of fine appearance; always well filled; meat of good flavor.

Success. One of the largest and best; shell very thin; kernel plump.

Van Deman. Large and oblong in shape; shell thin; kernels plump; good quality.

Pistachio Nut Seedlings

										Each	10
- 4	to	6	feet				,		,	.\$1.00	\$8.00
3	to	4	feet							80	6.00

The "Green Almond" of Europe. Tree of dwarf habit, producing nuts in enormous clusters. Thrives well in the interior val-leys. Not only very ornamental but profitable as well.

We list two varieties: Atlantica and Vera.

Walnut Seedlings

									Each	10	100
5	10	10	feet.			,			\$0.50	\$4.00	\$35.00
	10	- 8	feet.					,	.40	3.00	25.00
- 4	to	6	feet.		,	,			.30	2.50	20.00

American Black. Moderate grower, starting late in the spring. Nut is very hard, with corrugated exterior.

California Black. Rapid growing and desirable as a stock; adapts itself to all conditions. Nut medium size, hard, smooth shell.

Soft Shell Walnut, Grown from Selected Seed

										Each	10
6,	to	8	feet		,	,				\$0.50	\$4.00
4	to	6	feet		,	,				.40	3.00
2	to	4	feet							3.0	2.50

Placentia Perfection. ction. A chance seedling, recognized as a leader in now generally recog Southern California.

Santa Barbara Soft shell; kernel white. Soft Shell. Large; white, full and sweet.

Walnuts Grafted on California and Eastern Black

					10	100
			feet		\$10.00	\$80.00
G	t o	- 8	feet	 . 1.00	8.00	70.00
4	to	6	feet	 8.0	7.00	60.00

A'Bijou. (Large-fruited.) Immense in size; the quality of the kernel is excellent. Chaberte. Good size; kernel extra fine flavor; a good bearer; one of the best.

Cut-leaved. A most graceful ornamental tree, particularly adapted to gardens and lawns; foliage deeply cut and laciniated; nut large, round, smooth shell; kernel sweet and well filled; very best quality.

sweet and well filled; very best quality.

Franquette. The standard among walnuts, and commanding a higher price in the market than any other. Nut large, elongated, oval and very attractive in form; kernel full, sweet with a very rich nutty flavor. Blooms late in spring.

Mayette. This ranks with the Franquette as one of the leading commercial varieties. Imported under the trade name Grenoble; size large and unequalled as a dessert nut; an abundant bearer; starts very late in the spring.

Mayette Rouge. Identical with the Mayette, except that the nut is reddish.

Parisienne. Large; excellent; starts late. The nut is large and of fine shape.

Placentia Perfection. A vigorous grower; commences to bear abundantly about the fifth year after planting. An improved Santa Barbara Soft-Shell, commanding 1½ to 2 cts. per pound more than its parent.

Walnuts of Recent Introduction

Grafted on California and Eastern Black-Each 10 100 6 to 8 feet.....\$1.50 \$12.50 \$100.00

ureka. Regarded as one of the coming walnuts in the southern part of the state. Tree a vigorous, upright grower, leaves and blooms fully three weeks later than seedlings of the Santa Barbara Soft-Shell, and is therefore very desirable in localities subject to late frosts. An immense producer and one of the most resistant to blight. Nuts large, elongated, smooth and tightly sealed. tightly sealed.

Franquette Walnut.

Eureka Walnut. (See Page 12)

eff's Prelific. A rapid-spreading grower with smooth and clean bark. Blooms late but ripens its nut early. Nuts large, oval, Neff but ripens its nut early. Nuts large, oval, slightly ribbed and tightly sealed. Trees fifteen years old in orchard form have produced 215 pounds of fine, large nuts. Highly resistant to blight. Especially suited to Southern California conditions.

ONCORD. This popular variety originated from a seedling planted years ago by the father of Mr. George Westcott in Walnut Creek, Contra Costa County, Cal. The fact that the tree has been a strong grower, enormous bearer, producing large, smooth, round nuts, well filled, has placed it in the front rank as the sort to plant by all Walnut growers in this district. It is certainly worthy of trial in other sections of the state. CONCORD. of the state.

WALNUT TREES FOR TIMBER

Grafted-			Each	10
8 to 1	0 feet.	 	. \$1.50	\$12.50
			1.25	10.00

Burbank's latest creations in rapid-growing timber trees. For complete description of these trees, as well as for many other new and popular fruits, write for illustrated booklet in colors, entitled "New Products of the Trees." Price 25 cents.

Paradox. Grafted on California Black. It grows fully a third faster than the California Black, is very hardy and free from pests. Produces timber light in color and with fine, compact grain. In cold climates winter protection should be given the trees for two or three years. We can furnish no seedlings of this variety.

oyal. Grafted on California Black. A stately, symmetrical tree, with all the good qualities of the California Black, exceeding it by far in its rapidity of growth. The wood is exceedingly hard, closegrained and takes a silky polish, more nearly resembling the tropical mahogany. The scions for our grafted trees are taken from the original Royal tree.

Royal Seedling. Purchasers of seedlings must bear in mind that they may not equal parent tree in rapidity of growth.

Each 3 to 4 feet\$0.60 \$5.00

Japanese Varieties

									Each	10
2	to	3	feet						.\$0.60	\$5.00
1	to	2	feet						50	4.00

panese. Nuts produced in clusters; shell smooth; kernel very sweet.

NEW FIGS Smyrna Class

				Each	10	100	1000
4	to	5	feet	\$0.40	\$3.00	\$25.00	\$200.00
			feet		2.50	20.00	180.00
2	to	3	feet	25	2.00	18.00	160.00

Special attention is called to our fig trees, which are 2-year-old roots, and not sappy, over-irrigated yearlings. Our endeavor is to promote stocky, well-matured wood in our trees. Heights of trees are based on caliper measurements. Tall, pithy trees having no well-ripened wood invariably die back to the ground.

the ground.

Calimyrna. Large to very large; lemon-yellow; pulp reddish amber, sometimes pale, turning dark, just before falling; seeds large, yellow, fertile, overspread with a clear, white syrup, giving the fruit a richness and meatiness unsurpassed by any other Fig. Dries readily, dropping to the ground of its own accord. Aug to Oct.

Black, or Purple Bulletin Smyrna. Very large; light purple, streaked gray; pulp reddish pink; rich, luscious. Late Aug

Kassaba. Large; almost globular; skin pale green, pulp reddish pink. Sept

Wild, or Capri Class

The Smyrna Figs cannot be grown with-out Capri Figs. The Capri Figs serve as a nome for the minute insect. Blastophaga grossorum, the only insect which can carry the pollen from the Capri Figs to the fe-male flowers of the Smyrna types.

Each

tophaga.

Roeding's Capri No. Produces an abundance of the Profichi crop.

Roeding's Capri No. 3. Figs of the Profichi crop; quite large and early.

Capri Magnissalis. By far the largest, and abundantly supplied with insect galls. Our stock of trees is limited.

Capri Mileo. One of the most promising varieties. A good producer of all the crops necessary to perpetuate the insect. Profich crop rather late in maturing.

Adriatic Class

This class of figs does not require pollina-tion to mature its fruits. They will adapt themselves to a wider range of localities than the Smyrna types.

4	to	5	ft	Each . \$0.40	10 \$3.00	100 \$25.00	1000 \$200.00
			ft ft		$\frac{2.50}{2.00}$	$20.00 \\ 18.00$	180.00 150.00

ission. (California Black.) Stands in the lead of all black figs for shipping and drying. Tree a vigorous grower and heavy bearer. Late June and Aug.

San Pedro Black. Very large; violet-black; pulp red. Early in Aug.
San Pedro White (Fico de San Pietro).
"Apple Fig." Excellent flavor; skin golden yellow; very palatable. Middle of June.

Verdal Longue (Sultana, Verdal Honde). Very rich, sweet, aromatic. Sept. and Oct.

White Adriatic. Fruit large; greenish yellow; pulp carnation-red. Second week in Aug.

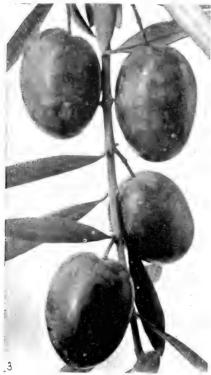

White Endich. Medium sized; thin white skin; pulp white. One of the best for canning and pickling. First week in Aug.

"CALIFORNIA HORTICULTURE." The Fruit-Grower's guide. By George C. Roeding. To learn more is to know more. We are desirous that you should know more about your orchard. Better preparation of your soil, proper pruning of your trees, irrigating and cultivating at the right time, are a few of the things our Guide will teach you, for only 25c.

OLIVES

OLIVES. These Trees are graded by caliper measurement only. Trees will be pruned back when dug.

1 to 2 in. caliper	100	1000
140 1 In. camper	\$125.00 100.00	900.00
1 to 5 in collings 10.00	90.00	800.00
s to 12 in. caliper	80.00 70.00	700.00 600.00

Sevillano Olive.

scolano. Large; early; among the best of the pickling varieties. First of Nov. Ascolano.

Atroviolacea, Medium size; da good oil Olive. Late Oct. Medium size; deep jet-black;

(New.) Introduced by U. S. Department of Agriculture. U. S. Department of Agriculture. This is the variety of Olive so extensively grown in Algiers for oil purposes. There are in Algiers for oil purposes. There are several hundred thousand acros of these Olives growing in Algiers on arid lands and the orchards are never irrigated. The trees are producing with us for the first time and it is quite evident they are enormous bearers. The Olives are small and only adapted for oil purposes,

Corregiola. Small; high grade for oil. Nov. Cucco. Large; valuable for pickling. Late Oct. Lucques. Crescent-shape; good for oil and pickling. Middle of Oct.

Manzanillo. One of the standards for green and ripe pickles. Produces oil of a very high grade. Very hardy, and a regular and prolific bearer. First week in Oct.

Manzanillo No. 2. Valuable for green pickles; rich in oil. Middle of Nov.

Mission. Tree a handsome, upright grower, and fine for avenues. Medium to large; excellent pickles; as well as a superior Late Oct. oil

Nevadillo Blanco. co. Medium; deep bl and makes a pickle of black: rapid grower; and makes a pickle of su-perior flavor, but runs somewhat small in size. Sept.

bliza. Large; borne in clusters on the stems. Excellent for pickles. Middle Oct. Pendulina. Grows in clusters and produces a high grade of oil. Last of Nov.

azzo. Oval; medium; yields the finest grade of oil. Last of Nov. R9770

GRAPES

Our stock of vines on their own roots, Phylloxera-Resistant roots and grafted on Phylloxera-Resistant roots, is very complete. Our vines are grown on new land causing them to have a fine, vigorous root system.

Our Book, California Horticulture, gives very complete descriptions of our Grapes, with information on laying out a vineyard; distances to plant; how to plant, and brief instructions how to prune, all of which would be of interest to any vineyardist, as well as full particulars about Resistant stock.

The vines will be supplied as follows: 500 at the 1000 rate, where this rate is quoted, in not less than 50 of any one variety; 50 at the 100 rate, in not less than 10 of a variety. In small lots of one or two of a kind, the 10 rate will apply, except in quantities of less than five vines, when the single rate will be charged.

New Grapes

Dattier de Beyrouth (Rosaki). Of the numerous varieties of Grapes which we have introduced from Europe in recent years, not one is to be compared to this magnificent variety. Bunches large, only not one is to be compared to this mag-nificent variety. Bunches large, only slightly shouldered; berries loose, never compact. Berries very large; quite oval in form, of a beautiful golden amber and covered with a whitish bloom; very fleshy; juicy and sweet, with little or no acidity. its keeping qualities are unsurpassed. We predict a great future for this beautiful Grape Aug.

Foreign Table Grapes of Very Recent Introduction

Each 10 100 Price\$0.50 \$4.00 \$30.00

A few years ago we introduced a number of new varieties of Grapes from France. It is only recently that we have observed these varieties sufficiently to feel at liberty to offer them for sale. They have been carefully tested in our trial grounds and their value has been fully determined. Our descriptions and recommendations are made from actual observation for several years.

Augulato. A very handsome grape, bluish black, large size, oval. Bunch large, closely set; flesh firm, juicy, sweet and crackling. A good table and market sort.

Buckland Sweetwater. A splendid English variety, exclusively grown for table use; bunch medium, compact; berries medium juicy; fine yellow skin when ripe. Aug.

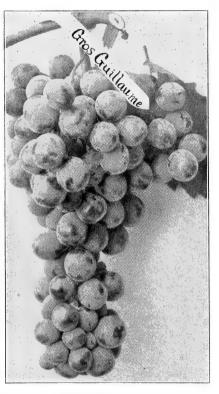

Damas Rose. Bunch large, compact; be large, elongated; red; very fine. Nov. herry

Dronkane. As a late shipping Grape this ronkane. As a late shipping Grape this sort has qualities which will cause it to be in great demand in the interior valleys. Bunches are very large, berries are ovalshaped, compactly set on the clusters. Berries of a metallic red, very firm and birchly flayered. Not highly flavored. Nov.

Gradiska. For home use this is a most desirable variety. The bunches are large, heavily shouldered; berries large, greenish white and of excellent flavor. A fine trelish Grape and a valuable dessert fruit. Sept.

Gros Guilliaume. Among the Grapes of recent introduction, this of the black type is the show fruit of them all. Bunches are of medium size but berries are as large as Damson Plums, with a coloring when year for the black continuity to the professional control of the coloring when year for the decoration that replaces large as Damson Flums, with a coloring when used for table decoration that makes them look as if molded in wax. Flavor the very best. Ripe in early Sept., but keep well until the middle of Oct. Enormous producers. Vines should be canepruned. Recommended for trellising.

Joannene, or Lignan. Ripe with us July I.
Much earlier and a far better Grape than
the White Sweetwater. Bunch medium;
berries compact, medium; flesh sweet and
juicy; golden yellow when ripe.

Gros Guillaume.

Maraville de Malaga. It is no exaggeration to say that this Grape has a coloring of red which is later modified with a bluish tint, which will make it an excellent market variety. Bunches long and loose; berries large, conical, oval. Ripe in Sept. and will keep in the best of condition until the middle of October; flesh crisp and juicy.

Ohanes d' Almeria. Bunch above average. flavor; good shipper. This variety is imported from Spain in cork dust. Nov.

ported from Spain in cork dust. Nov. Olivette Blanche. As this variety does not ripen until Oct. it is adapted only to warm climates. The Grape is large, fully 2 ins. long, never too close; berries long, olive-shaped, greenish amber, slightly brown on side exposed to sun; crisp, firm, with a neutral flavor. Vine very abundantly furnished with foliage and not only produces heavily but is a vigorous grower. As a market Grape and for trellising it is sure to take a prominent place.

market Grape and for trellising it is sure to take a prominent place.

Olivette de Vendemian. This Grape bears a very close resemblance to the Almeria, so extensively exported from Spain, packed in cork dust, with several important exceptions. Vine stronger grower, not so subject to mildew; bunches and berries larger. In every way a better Grape. Oct.

Graves Continued

Olivette Blanche (See Page

Piment. Looks very much like Flame Tokay, iment. Looks very much like riame iona, but bunches are more cylindrical and berries larger. Lacks flavor but gives every indication of being a good shipping Grape.

renthan Black. An early, large black Grape of fine flavor. Bunches shouldered and tapering. A good bearer. Trenthan

Industry. Largest size; dark red. 1 year\$0.25 \$2.00

Strawberries

Price\$0.25 \$1.00 \$5.00 Except where noted.

Brandywine. Large; roundish; conical; flesh firm; a valuable medium to late variety
Jessie. Large; handsome; roundish; conical; dark red; plant vigorous and productive.
Marshall. Very large; dark rich crimson; quality good; firm.

New Strawberry, "Patagonia"

This magnificent new strawberry, which we This magnincent new strawberry, which we offer, is sure to be in great demand in all strawberry sections. It is not necessary to dwell on its possibilities further than to say that the vines are strong growers, the foliage large and stands upright, the berries have a delicacy of flavor and aroma combined with a firmness which is sure to make them popular for home consumption and marketing.

ASPARAGUS

100 Roots\$0.50 \$1.50 \$10.00 Conover's Colossal. A standard kind of first quality; tender and highly flavored. Palmetto. A valuable variety, producing enormous and delicious sprouts.

ARTICHOKE

lobe. Plant presents a very tropical appearance and is therefore a valuable addition to any garden. Flower-buds should be cut off as soon as they are well formed and before the scales open, otherwise they are tough and tasteless. Never allow flowers to mature, as plants will dwindle down and Globe 10 die. Each 10 100\$0.20 \$1.50 \$12.00 Price

Jerusalem Artichokes

Jerusalem, Purple. An enormous cropper, producing from 15 to 20 tons to the acrecropper. 5 lbs. 100 lbs. Tubers\$0.50 \$2.00

Jerusalem, White. Resembles a potation more than an artichoke, having shallower eyes, much smoother skin than the preceding.

5 lbs. 100 lbs. Tubers\$1.00

RHUBARB

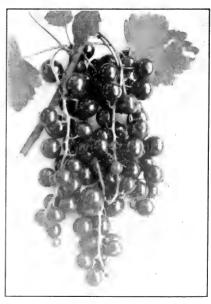

Myatt's Linnaeus. Large; early; tender and Each 10 100\$0.15 \$1.00 \$8.00 fine Price

Burbank's Crimson Winter. Pale, greenish crimson; especially adapted to the long seasons of California.

Each 10 100 1000 Price\$0.20 \$1.50 \$10.00 \$75.00

urbank's Giant Crimson Winter. A new and distinct variety which must not be confounded with Crimson Winter Rhubarb. A robust grower and prollife producer of mammoth stalks, three times the size of the older sort; thrives amazingly during the winter months; of fine flavor, suggestive of pine apple and ripe loquats. Burbank's Giant Crimson Winter.

Each 1.0 Price\$0.75 \$6.50 \$60.00

Perfection Currant.

Garden Scene.

Ornamental Department

Space will not permit us to give more than a very brief description of ornamentals in this booklet; for complete descriptions, reference must be made to "California Horticulture," copy of which will be mailed for 25c, postage paid.

DECIDUOUS TREES

ALBIZZIA Julibrissin (Acacia Nemu). A handsome avenue tree. Feathery foliage; pink feathery flowers.
Each 10 4 to 6 ft
3 to 4 ft
broad, round head and dense bluish green foliage. Each 6 to 8 ft

Flowering (F. Ornus). Moderate grower,
with fragrant, greenish white flowers,
borne in large clusters on ends of
branches. Each 10
branches. Each 10 8 to 10 ft\$1.25
6 to 8 ft
Green (F. lanceolata). Of medium growth
with slender branches and bright green
leaves. A fine specimen tree.

EVERGREEN TREES

invite inspection of our evergreen We invite inspection of our evergreen stocks as it often happens we have an as-sortment of large sizes in specimen plants on which it is difficult to make quotations in this list.

This list includes trees that do not shed all their foliage at one time, thereby re-maining green after deciduous trees are

All stock quoted in tubs and boxes are specimens which have been well established in their containers.

Acacias

Although there are some 400 species of Acacia, we have confined ourselves to varieties of well-known merit, the uses of which are enumerated below. The Acacia finds the most favorable conditions to its development in California.

Eucalyptus (The Gum Tree)

The tree is a native of Australia and serves a variety of purposes—for example, it is often planted in damp, swamp places, where it acts as a sort of drain, absorbing excess moisture and frequently improving an otherwise malarial locality. The ornamental value of the Eucalyptus is considerable; its merits should not be overlooked.

All varieties planted in flats contain about 100 plants to the flat. As it is necessary to cut the flat in case a smaller quantity is ordered, part flats will be charged at 1½ cents per tree higher than the hundred rate. Citriodora (Lemon-scented). A handsome

Citriodora (Lemon-scented). A handsome fast-growing tree, one of the most attractive. Leaves have lemon odor.

Each 10 ...\$0.40 \$3.00 Potted, 2 to 3 ft.....\$0.40 \$3.00

Corynocalyx. Beautiful, upright grower; distinct, bright, shiny leaves; timber very durable. A graceful avenue tree.

Each 10

Ficifolia (Crimson-Flowering). A unique type; dwarfish habit, large, dark green leaves and great clusters of brilliant scarlet flowers. Seed-cones so large they are often used for pipe bowls.

lobulus (Blue Gum). Broad, blutsh leaves when young. More extensively planted than any other variety; wood when polished resembles hickory. Valuable for wagon work, bridges, toolhandles, insulator pins, and as firewood.

Potted, 5 to 6 ft... \$1.00 \$4.00 \$30.00 \$25.00 Potted, 4 to 5 ft... \$40 \$3.00 \$25.00 Globulus

Transplanted in flats, 10 to 12 in., \$1.75 per 100, \$16 per 1000.

Polyanthema (Red Box). A fine avenue tree; leaves round, silvery; a late bloomer, not subject to drought and cold.

Plumosa aurea (Golden Jananese Cynress)	
Dense growing, more conical than pre- ceding. Young shoots and foliage goiden	
yellow. Each	
Balled, 1 to 1½ ft\$1.00	
SCIADOPITYS Verticillata (Umbrella Pine).	
Branches in regular whorls; leaves deep green. lustrous. A fine lawn tree; not adapted to the interior valley; does well	
green, lustrous. A fine lawn tree; not adapted to the interior valley does well	
Potted, 2 to 3 ft\$1.25	

SPRUCES AND FIRS (Abies)

In habit of growth the Spruces are very similar to the Firs, but the branches stand out from the main stem more horizontally, and not so closely together. Distinguished from the Firs mainly by their drooping cones and linear flat leaves on the upper side of the branches; the Firs have their needles short and scattered all around the branches. branches

Alba (White Spruce). Foliage silvery gray;

PALMS

No plants are more decorative, for in-doors or out. The smaller and more tender varieties "set off" interior decorations, while the larger and hardler varieties are invaluable for garden, lawn and avenue. We carry a large stock in boxes and tubs, which have

been taken from the open ground, and are well established. These can be used either for porch decorations or planted out in the open. Such plants give an immediate ef-fect, and never go back, when transplanted. All marked with an asterisk are for indoors and conservatory decoration.

Field-Grown Roses

For cultural instructions and detailed description refer to "California Horticulture."

We have the finest assortment of field grown, budded roses we have ever offered. This stock is growing at San Jose, California, and anyone acquainted with the grade of stock there will not hesitate to place his orders for these plants. The soil is particularly adapted to rose culture and the climatic conditions for growing this stock cannot be excelled anywhere in California. This stock will mature and be ready for shipment the latter part of

Varieties marked with an Asterisk (*) can also be supplied "on own roots" and are grown at our branch nurseries in Orange County, California.

Varieties marked "Newest in roses," which will be imported, will be ready for shipment about February 1st.

Newest in Roses

We take pleasure in calling attention to a few varieties of roses which our Mr. Geo. C. Roeding saw in a number of different nurseries while on his recent trip to Europe. Many of these sorts are entirely new and have never been offered for sale before in the United States.

Among the immense list of new roses, it is a source of satisfaction to us to be in a position to offer for sale a few of the very best varieties.

Each Price \$0.75

CHATEAU DE CLOS VOUGEOT HATEAU DE CLOS VOUGEOT (H. T.). This remarkable rose, originated by the firm of Pernet-Ducher, will undoubtedly take a leading place among those who pride themselves in having something unusual in the rose line. The color is varied from a deep velvety scarlet shaded to bright red and then to dark velvety crimson, as the flowers expand. Its fragrance is very pronounced. (H. T.). grance is very pronounced.

ERNA TESCHENDORFF (Dwarf Poly.) Ever since the introduction of Mad. Norbert RNA TESCHENDORFF (Dwarf Poly.) Ever since the introduction of Mad. Norbert Levavasseur, rose originators have been endeavoring to improve this family of roses; it remained, however, for Victor Teschendorff, of Dresden, to originate a variety which stands out supreme as the best of the roses of this type. The color is a brilliant carmine red, similar to Gruss an Teplitz. It is not only a very free bloomer, but in addition to this, the originator has instilled into this variety a permanency of color which has always been wanting in other roses of this family.

FARBEN-KONIGIN (H. T.). In a group of roses, this variety stands out so clearly that one is attracted to it from a distance. The color is a carmine rose, inclined to somewhat deeper color on the outside of the petals; flowers very large and full.

HEINRICH MUNCH (H. P.) The p nent place which the magnificent The prominent place which the magnificent rose, Frau Karl Druschki, has established for itself among the list of white roses will cause this new rose of German origin to be accorded the same position among the pink roses. It has every characteristic of the Druschki with the exception that the plants are somewhat stronger growers and the flowers are more striking, both in bud form and when fully open. The petals are beautifully reflexed. It is sure to be accorded a high place among the list of new roses.

Roses Continued

ONKHEER J. L. MOCK (II. T.). Of all the roses of recent origin this stands out as a leader among the immense assortment of new roses and is so distinct that it will win its way and stand out permanently as a standard when many other sorts are long forgotten. It is not only fine in bud, being full and well formed, but it is equally as good when it opens up. In color, it is a mixture of bright red and salmon pink. As a grower, it is among the best. JONKHEER J. L. MOCK (H. among the best.

JULIET (Hybrid Briar). Recognized as being a distinct type of rose. It is a most wonderful grower, sending up long strong stems surmounted by flowers of most uniflowers of most u stems surmounted by flowers of most que color; the outside of the petals old gold; the interior, rich rosy changing to deep rose as the flowers pand; very large and full; delicious grance; excites universal colorious delicious fra-

pand: very large and full; delicious fra-grance: excites universal admiration.

KONIGIN CAROLA (H. T.). A seedling from Caroline Testout. Satiny rose with reverse of petals silvery rose. Very strik-ing and free flowering. Even more so than its parent.

LAURENT CARLE (H. T.). Brilliant velvety carmine; flowers very large, of perfect form, not too full, always opening

LIEUTENANT CHAURE (H. T.). Vigorous grower; long buds borne on long stems. Will become a very valuable sort for forcing and as a cut rose. A cross between Liberty and Etoile de France. Velvety crimson shaded garnet.

ASHTOWN (H. T.). This is recog-i as being one of the best of its type altivation; very free bloomer and keeps in cultivation; very free bloomer and keeps a splendid color; pale rose shading to yel-low at base of petals, reflex of petals sil-very pink; buds long and pointed; flowers large and full. in cultivation;

LADY HILLINGDON (T.). A cross of Papa Gontier and Mad Hoste. A grand rose for either pot work or garden decoration. Blooms continuously, buds very long with a most pleasing shade of orange yellow. Particularly fine in the bud state.

Particularly nne in the bud state.

LEUCHTFEUER (Bengal). Among the new roses for bedding or massing, there is probably no variety grown today which is more effective than this rose of very recent origin. Its free blooming qualities, its brilliant blood red color combine to place it among the top notchers.

and entire place it among the top hoteles.

MADAM JULE GROLEZ (H. T.). Another rose of very highest quality and entitled to a place at the head of the list among the roses deserving of the greatest recognition. Color a beautiful satiny China nition. Color a beautiful satiny China rose; flowers of large size; very double; of good form and very free flowering. Deserves to be planted extensively.

SERVES to be planted extensively.

SUNBURST (H. T.). (Pernet Ducher, 1911).
May be described as a glorified Mrs. Aaron
Ward. Few roses have so many favorable points all combined in one plant. Its
bronzy foliage; absence of thorns; its long
pointed orange yellow buds becoming deeper towards the center carried on long er towards the center, carried on long stiff stems, places it in the front rank among the new roses

RAYON D' OR (H. B.). There is p no yellow rose in existence toda posseses the remarkable coloring probably today that posseses the remarkable coloring of this grand new rose. A vigorous grower, of fine branching habit, with fine bronzy green foliage and oval shaped buds; tinged coppery orange. It is not only very attractive in this form but equally so when the flowers are expanded, on account of the flowers are expanded, on account of the flowers are expanded. the flowers are expanded, on account of its fine substance and magnificent golden yellow coloring; in every way a superb

edged rose.

Our Own Publications:

California Horticulture. The book consists of 120 pages illustrated with upward of a hundred original half-tones and two-color plates, and a handsome cover showing olives and grapes in color. Every phase of the management of orchards, vineyards and home grounds, soil preparation, planting, cultivating, irrigating, pruning, etc., as it has been carried on by the best fruit-growers in California, is made plain. This book is in no sense an enumeration of nursery stock, but is just full of practical suggestions and methods which have been tried and known to have given the best results in orchards, field, garden and vineyard. A compendium of methods and suggestions, together with a list of plants for general horticultural purposes. Price, 25 cents per copy, carriage prepaid.

New Products of the Trees. All about the latest and most valuable of Burbank's introductions, which we are offering for sale. Beautifully illustrated in natural colors from life, and half-tone engravings, made direct from the fruit and plant and from photographs. 95 cents

Spanish Catalogue. Describes the leading and most desirable varieties of fruit trees, grape-vines, ornamental plants and roses and is of special interest to our Mexican, Philippine and South American trade. Mailed on application.

Books for Horticulturists:

California Fruits and How to Grow Them. Fifth edition, revised and extended. Manual of Methods which have yielded greatest success. By Edward J. Wickson, A. M. Size of page, 61% by 91% inches, about 600 pages, bound in cloth and fully illustrated. Carriage prepaid, \$3 per copy.

California Vegetables, in Garden and Field. Second edition, revised and extended. A manual of practice with or without irrigation for semi-tropical countries. By Edward J. Wickson, A. M. Sizes of page, 6 by 94, 368 pages, well printed and strongly bound in cloth; illustrated. Carriage prepaid, \$2.

Farm and Garden Rule Book. By Prof. L. H. Bailey. A new edition of the Horticulturists Rule Book and Compendium of Useful Information for Nurserymen, Florists, Seedmen, and Fruit-Growers. Size of book, 12mo., containing 587 pages plus 24 pages of front matter. Price, \$2, postage paid

Fancher Creek Nurseries, Inc.
